Presentation

WHAT IS AVALANCHE BLOCKCHAIN?

Avalanche is a Layer1 blockchain, released in September 2020. Avalanche has quickly become widespread in the cryptocurrency world and has reached a serious market value with its transaction speed and technological infrastructure.

Avalanche blockchain offers its users an easy to use ecosystem.

Avalanche has a favorable structure in many innovative areas such as DeFi, NFT, Metaverse.

AVAX Coin is the native cryptocurrency of the Avalanche Blockchain.

WHAT IS AVAXLINE?

Avaxline is a DEFI (Decentralized Finance) system that operates with smart contract in Avalanche Blockchain network.

It works in conjunction with TrustWallet and Metamask wallets and the transactions are carried out automatically by the smart contract.

Avaxline vision is to protect the investment amount at the possible highest level in negative market conditions and to reach maximum profit in stable and positive market conditions.

The Avaxline smart contract algorithm is designed to build its ecosystem with stability.

avaxline.com

HOW IT WORKS?

- Avaxline, the staking period is 1 year.
- Smart contract creates its own ecosystem by following the market price movements.
- The algorithm will be able to provide variable passive income up to max 265% USDT annually with USDT/AVAX matching earnings under stable and positive market conditions,
- In negative or volatile market conditions; it is designed to protect the invested USDT amount to the maximum with AVAX earnings.
- In this way; with the start of staking, users will be able to protect their investments in terms of \$ in negative market conditions and they will earn in \$ basis in stable, positive or volatile market conditions.

avaxline.com

USDT is Tether stable coin (1 USDT = \$1). \$ expressions represent USDT.

HOW IT WORKS?

- Your account will be active as soon as your staking process starts.
- The minimum investment is **\$30/AVAX**.
- Earnings are calculated daily.
- The contract automatically sends withdrawal requests.
- Investments and withdrawals are made with AVAX.
- The staking process ends with the completion of investment and earnings production.
- Multiple stakes can be started under 1 account at different amounts and times.
- Each staking process is valid 1 year.
- The weekly withdrawal limit is 12.5% of your total investment. It increases automatically proportionally with renewed investments.

(Example: 100 AVAX investment weekly withdrawal limit will be $100 \times 12.5\% = 12.5$ AVAX, after 1 year, when 100 AVAX is reinvested, will be $200 \times 12.5\% = 25$ AVAX weekly withdrawal limit.)
